

Figure 1

The figure illustrates the relationship between the number of subjects per group (n) and the number of groups (k). The x-axis represents n from 0 to 100, and the y-axis represents k from 0 to 10. Horizontal bars indicate the range of n for each k . The bars are labeled with their corresponding k values: 2, 3, 4, 5, 6, 7, 8, 9, and 10. As k increases, the range of n values decreases, eventually converging at $n=10$.
